MADE IN USA.

2-way sound systems

Different music must be played using different method. That is why Csp offers so many series of products. It is appropriate to say that the CLS series is designed for live performance.

Live musical performance has special requirements for sound restoration. For example, we first consider flexibility for low frequency. (We also take strength into consideration but not much.) What mid to high frequency requires is penetration, not smoothness and fineness. Whether low frequency, mid or high frequency, they all require sufficient large receiving power capability. These are what CLX possess.

Dual 12" 12LV3 2-way high output stage system with 1200 watts continuous, 240 watts program, 4800 watts peak power handling. 220H horn has incredible projection even in difficult acoustic environments.
