## 18" Bass Systems

When describing sound, the general public uses the words "fine and smooth". Some also use the word "earth-shaking". Csp engineers use the word "luxury" to describe LADM sound!

Solid and strong bass, saturated mid to low frequencies, stable median and natural high frequency response are the reasons that LADM is referred to as luxury.

Due to the luxury of LADM, Csp engineers invented an important name to score the acoustic quality. That is "focus". The use of this name shall provide a quantified data to the appraisal of acoustic products.

LA18BM ultra bass, when the frequency division point is set at 200Hz, will surround you with super strong dynamics to make you feel "difficult" to breath. It can form a frequency-halving system with LA12DM and LA15DM.
