P.PA[®] Series

The P.PA is a powerful power amplifier, ideal for use in high quality touring sound systems as well as in demanding permanent installations.

The P.PA Series are built exclusively in Csp's own USA manufacturing facility, with internal components selected for premium quality and proven durability. Each modular subassembly is pre-tested, and the assembled P.PA Series receives a rigorous hot room burn-in before thorough final checkout on precision test equipment.
